- South Bekasi, West Java, Indonesia

SUMMARY

A web developer who always work hard, smart, and responsible in most of every opportunity by looking for the best solutions. Developing company profile web applications, POS systems, and other systems from database design, APIs, user interfaces, to web optimization to be ready for production.

Enthusiastic about new technologies, especially in terms of web optimization and currently deepening React Hooks, Typescript, GraphQL, Storybook, and Nextjs. Actively share thoughts and experiences in the IT community on social media.

It's great to get to know you!

EXPERIENCE

08/2022 - Present

Software Engineer

Freelance

Responsible for:

- · Build many web app projects with team and solo.
- · Lead team of 2 and 3 for a couple of projects.
- Distribute weekly tasks.
- Manage and lead scrum meeting on weekly basis.
- · Provide troubleshoot discussions with Team.
- · Design the database structure and it's relational data.
- Architecting application. Choose the right language, framework, library, infrastructure, etc.

X

Some of the projects are:

- Membership Information System
- · Web client optimization
- Blog

Skills:

 $\label{eq:continuous} TypeScript \cdot React.js \cdot Tailwind \ CSS \cdot JavaScript \cdot Next.js \cdot Express.js \cdot Git \cdot PostgreSQL \cdot Postman \ API \cdot Node.js \cdot REST \ APIs \cdot JSON \cdot Material-UI \cdot notion$

09/2021 - 07/2022

Software Engineer

Profesi.io (SRW&Co.)

- Design and implement Multi-language feature into existing systems on DB, BE, and FE without side effects.
- Implementation of user activity logs.
- Maximize Typescript with Typesafe implementation (interface, type, enum, etc) in Backend and Frontend
- Optimized the code to be more consistent with Typesafe.
- Speed up the development time of BE and FE with Typesafe.
- Minimize bugs in BE and FE with Typesafe.
- Modularization of Class and Function to make it more tidy (DRY, KISS).
- · Initiate versioning.

- Tracking and resolving technical debt (tech debt) on existing systems from DB, BE, and FE.
- · Refactor some features.
- Convert the design from figma to UI in the app.
- · Design and execute features and modules according to the specifications of the Product Team
- · Daily standups and weekly scrum meetings.
- Interview Lead Backend, Senior Frontend, Software Engineer, and Automation QA Engineer candidates.
- · Create an assessment framework for Automation QA Engineer.
- · Assess the Automation QA Engineer technical tests.

M

Skills:

 $\label{eq:continuous_state} TypeScript \cdot JavaScript \cdot Git \cdot PostgreSQL \cdot Postman \ API \cdot Node.js \cdot Jira \cdot REST \ APIs \cdot JSON \cdot Adonis Js \cdot Nuxt.js \cdot Vue.js \cdot docker \cdot Google \ Cloud \ Platform (GCP)$

01/2019 - 01/2022

Software Engineer

Freelance

Responsible for:

- Build many web app projects with team and solo.
- · Lead team of 2 and 3 for a couple of projects.
- Distribute weekly tasks.
- · Manage and lead scrum meeting on weekly basis.
- · Provide troubleshoot discussions with Team.
- · Increase presence in Search Engines by maximizing SEO.
- Design the database structure and it's relational data.
- Architecting application. Choose the right language, framework, library, infrastructure, etc.

X

Some of the projects are:

- · Company Profile
- · Landing Page
- · Point of Sale
- · Inventory Information System
- · Human Resources Information System

EDUCATION

2021 Informatics Engineering

Universitas Komputer Indonesia

Bachelor of Computer Science

- · Beasiswa Peningkatan Prestasi Akademik (BPPA).
- Himpunan Mahasiswa Teknik Informatika (HMIF) UNIKOM.

- Majelis Permusyawaratan Mahasiswa (MPM) UNIKOM.
- Dewan Permusyawaratan Mahasiswa (DPM) UNIKOM

CERTIFICATES

| 10/2021 - 10/2024 | Belajar Fundamental Front-End Web Development (Dicoding Indonesia) |
|-------------------|--|
| 07/2021 - 07/2024 | React Course (Progate) |
| 07/2021 - 07/2024 | Path Pengembangan Web (Node.js) (Progate) |
| 07/2021 - 07/2024 | Belajar Membuat Front-End Web untuk Pemula (Dicoding Indonesia) |
| 07/2021 - 07/2024 | Belajar Dasar Pemrograman Web (Dicoding Indonesia) |
| 03/2021 - 03/2024 | Belajar Machine Learning untuk Pemula (Dicoding Indonesia) |

RINGKASAN

Pengembang web yang selalu bekerja keras, cerdas, dan bertanggung jawab di hampir setiap kesempatan dengan mencari solusi terbaik. Mengembangkan aplikasi web profil perusahaan, sistem POS, dan sistem lainnya mulai dari perancangan database, API, antarmuka, hingga optimasi untuk deploy server.

Antusias terhadap teknologi baru, terutama terkait optimasi website dan sekarang sedang memperdalam React Hooks, Typescript, GraphQL, Storybook, dan Nextjs. Aktif berbagi pengalaman dalam komunitas IT di sosial media.

It's great to get to know you!

PENGALAMAN

08/2022 - Saat ini

Software Engineer

Freelance

Bertanggung jawab terhadap:

- Membangun projek Web App dengan Tim dan Solo.
- · Memimpin tim dengan 2 atau 3 orang dalam beberapa projek.
- · Membagikan tugas mingguan.
- Mengelola dan memimpin Scrum Meeting berskala mingguan.
- · Menyediakan dan memimpin diskusi untuk troubleshoot bersama Tim.
- · Desain struktur database dan relasi antar data.
- Menarsitek aplikasi. Mulai dari pemilihan bahasa, framework, library, infra, dst.

X

Beberapa projeknya, yaitu:

- · Sistem Informasi Keanggotaan
- · Optimasi web client
- Blog

Keahlian:

 $\label{eq:continuous_state} TypeScript \cdot React.js \cdot Tailwind \ CSS \cdot JavaScript \cdot Next.js \cdot Express.js \cdot Git \cdot PostgreSQL \cdot Postman \ API \cdot Node.js \cdot REST \ APIs \cdot JSON \cdot Material-UI \cdot notion$

09/2021 - 07/2022

Software Engineer

Profesi.io (SRW&Co.)

- Merancang dan implementasi multi bahasa ke dalam sistem existing dari DB, BE, dan FE tanpa efek samping.
- Implementasi log aktifitas pengguna.
- Memaksimalkan Typescript dengan implementasi Typesafe (interface, type, enum, dll) di BE dan FF
- Optimasi kodingan agar lebih konsisten dengan Typesafe.
- Mempercepat waktu pengembangan BE dan FE dengan Typesafe.
- Minimalisir bug di BE dan FE dengan Typesafe.
- Modularisasi Class dan Function agar lebih rapi (DRY, KISS).
- · Inisiasi versioning.

- Melacak dan mensolusikan utang teknis (tech debt) pada sistem existing dari DB, BE, dan FE.
- · Refactor beberapa fitur.
- Merubah desain dari figma menjadi UI di aplikasi.
- · Merancang dan eksekusi fitur-fitur serta modul-modul sesuai spesifikasi dari Tim Produk
- · Daily standups dan weekly scrum meeting.
- Interview Lead Backend, Senior Frontend, Software Engineer, and Automation QA Engineer candidates.
- Membuat kerangka penilaian untuk Automation QA Engineer.
- · Menilai hasil technical test untuk Automation QA Engineer.
